THE BOTTOMEROS SAGURNAY.

A Prot's Mosalight Trip Down the

This river of death of Seguency, is bettern-less. You might, if possible, drain the St. Lawrence river dry, mays Mr. Le Moise, the Canadian authority, and yet the dark, still river would be able to float the Great Eastern river would be able to float the Great Rastern and all her majesty's ships of the line. "A bottomiess river" sounds strangely new; indeed, were it not so I should not trouble you or myself to mention it. But this river is thus far unfathorned. It is full of counter currents, swift, pelirous in the extreme. As the vast red moon comes shouldering up out of the St. Lawrence away above toward the sea and stood there a glowing period to a great day, we draw back from Tadousac, where the ancient church sits in the tawnsy sand and scattering grass, and, rounding a granite headland, we slowly steamed up the silent river of death. It widened a little as we went forward, but even us and car all possible advance. Then as we rounded another weary and eternal cape of overhanging grantle, in its few frightened and torn trees, the dark way would open before us. And ten, twenty, thirty miles more of silence, gloom, river of death. No sound. No sign of life is here. Summer or winter, apringtime or autumn, all seasons sille, no high to heast not over the arculate inner. apringtime or autumn, all seasons silks, no bird, no beast, not even the smallest insect, wave only a possible housefy that may harbor in the steamboat and so be brought with you, is ever seen here. This is literally the river of death. I know no spot like it on the face of this earth. Our deserts with their owls, norn-toads, prairle dogs, and rattlesnakes are populous with life in comparison. And yet this awful absource of all kinds of life age not be due to

with life in comparison. And yet this awful absence of all kinds of life can not be due to the waters. They are famous for fish of the best kind. The air is certainly delicious. But all this wast river's shore is as empty of And no man has settled here For nearly too miles not a sign of man is seen. You seem to be a sort of Columbus, as if no man had ever been here before you. At every turn of a great grantte cape these lines rhymed incessantly in my ears.

Opon that elect see.

An hour past midnight and we neared the central object of the journey. Cape Trinity, a granite wall of about 2,000 feet, which in places literally overhangs the skip. Our captain hid the vessel closely against the monolith, and for a moment rested there. We seemed so small. The great steamer was as a little toy, held out there in the hollow of God's hand.

A Funny Lecture With Comic Pic-

Punk Beard, the artist, appears to extract plenty of fur out of his illustrated lectures at Chautauqua. A correspondent of The New ark Advertisor thus describes one of those lectures: "His panorama, painted, as he himself state), at a cost of nearly \$1, was the basis of his lecture. To describe the pictures would resemble in its effect the drinking of a glass of soda that has a ood an hour. The panorams creaked along with Heard ravel and fidded and explained and made fun of the C L S C, and other subjects dear to the Chautauqua heart. The pictures were original in their conception. Bloomington Leader: We are on the verge of another great strike. It will come next year. The Democrats of Indiana who, according to Democratic papers, received \$2 for on North Macon to the alley. voting the Republican ticket in 1880, have solemnly resolved that, on account of the increased cost of living, the price in 1884 must be at least \$2.50. They will appoint a committee to compromise the matter at \$2.25, if possible.

THE Democrate of Pooris county have been most unfortunate in their selection of county officials. Joseph Ledd, who held the office of Treasurer and Collector for four years, first squandered some \$35, 000 of the county's money. Ten years later Thomas A. Shafer, who was treasurer from 1867 to 1860, got away with \$68,000. A Mr. Kettelle, who held the office of county clerk, was accused of crockedness, and cacaped prosecution through much smoke and ire. Last comes County Attorney Aiva Loneks, whose shortcomings toot up about \$35,000, and run up the grand total of Democratic steading in Peoris county to near \$100,000. In this connectron it should be atsed t ast the Republicans had control of the county for nearly twenty years and laws not a sinin on the record of any man they honored with an office. READING, Pa., Sept. 8 .- John Heffner

German rappicker, a resident of this city, who was killed on the Pennsylvania railroad at Lancaster, yesterday, bad a re-markable history. Heffuer was a familia figure on the streets of Reading, and could be seen almost puy day going along the gutters picking up rays, etc. He was di years old and was horn in Wurtemburg, Goron and was norn in warremours, our many. The remarkable thing about Heffner's life was the large number of children. He was married three times and had a brood of forty-two children, only five of whom—all daughters ranging in age from \$10.37 years—survive.

When 25 years and in 1840 he parried his When 25 years old, in 1840, he married bi first wife in Germany. She lived eight years, and became the mother of seventeen children in that time, having twins the first year of their marriage. The next year brought forth another pair of twins. Each succeeding year for four years thereafter Mrs. lieftner became the mother of triplets; then she died, and was laid away it the village churchyard in Germany. The widower new had a family of seventeen children. Three months thereafters young lady took charge of the children, and in the surse of time she became the second Mrs. Heffoer. In February, 1849, this second wife presented hir. Heffner with a boy. On Christmas day of the same year the nine flock. The family was now larger than sny other in that part of the country. When they gathered around the table the household had the appearance of an orphan asylum. Five years passed on and Mr. Heffner's family was increased by the addition of ten more children, a pair of twins being born every year. Fo born. In 1854 Heffner came to this country with his family. In 1857 his wife died, having been married nine years. He is now the father of thirty-two

children, twelve of whom had died, leaving twenty to be taken in charge by a widow whom he married in 1866. Mrs. Heffner No. 3 had one child by a previous more oblidgen in ten years by single bliths second wife's still live, and three of the ventuhe became the father of forty-two children. MEMPHIS, Tonn., Sept. 8 .- A horrible story of outrage on a little girl 13 years old came to light yesterday. She was the daughter of a laborer named. Krebs of this city, and about four months ago was given a home in the family of a planter named J. J. Carter, residing near Fisherville, in this county. According to the child's statement, some time after going to Carter's house he began taking liberties with her, finally comwas repeated again and again. A young white man on the place named White was also a participant in the horrible series of outrages. The details of their treatment as related by the girl are unfit for publication, and form one of the most loathsome chapters of criminal history in this section. Yinally the girl began to have convulsions The attacks became so frequent that Carter fearing that she die on his hands, concluded to return

her to her parents, and brought her in a wagon, campleg out in the woods the first night. His flendish treatment of the gir continued almost up to the threshold of her parents' home. Arriving in the city, he put up at a wagou-yard, he and the girl sleeping in the wagon, and during the night she again was seized with convuisions so with a horrible disease which led to the diswhich a northic disease which the to the dis-covery of the horrible entrages perpetrated upon her by Carey and White, the told the whole story, upon which Carter was ar-rested and imprisoned. Fine Wheat in Minuscota MINNEAPOLIS, Minn., Sept. 8.-Mr. Jas. Marshall, of Griffith & Marshall, whose opinion is based on careful personal research and reliable private advices, says the wheat crop west of Glencoe, and more particularwww.st of Milbrook, on the Hastings and Dakota railroad, and the crop on the James iver valley will be the largest and finest abed there since 1877. The yield is from ighteen to thirty-five bushels per sere, and there is a very large percentage of No. I hard. We shall get more of this wheat than heretofore unless we make serious mistakes. The best point about the wheat west of Milbank and the James river valley is its dreness. They have had no rain there since June, and the wheat will never sweat. I guarantee this, I have just seen samples of but grain which were placed in bins a year ago this time fresh from the thresher and ot disturbed since, which is as fine as silk,

and has been all the time."
"How about the Northern wheat?" "That I am not as well posted on, but that grown on the Breckenridge Division of the Manitoha, beyond the timber belt, is of magnificent quality and yields largely. The timber wheat this year will prove to be badly shrunken. I think that one or two of our hot spells, which did not affect prairie wheat, did great damage to timber wheat shrinking it badly. As to the Red liver Valley and Northern Pacific crops, 1 am not so well posted."

The Republican party had been collecting about \$100,000,000 anmusily from the people is excess of the sum needed for legitimate expenditures. This abundance of money had been a remptation to capitally and extravagance. The revision of the tariff had increased the revenue instead of diminishing it, the receipts for July, 1888, being \$1,090,000 greater than for July, 1882. His uttermees upon the tariff were of the most cautious and ger aral kind. There must be a taciff until the laht was extinguished, and probably afterwards for current revenue, and that tariff hould be wisely adjusted to protect home adustry without fostering monopolies, and to afford good returns for labor without in the gentle statesman's mouth when on this question. Considerable time was occupied in talking about the Indiana eloction of 188), and in reading from Dorsey. He said: "I would not have asked your attentions to the confessions of Dorsey and his trusted lieutenants but for the fact that what they did was known to the most distingulahed leaders of the party and approved by them. No warrior returning from the field of victory, no of New York city, came here some weeks

representative to foreign land bringing boma the sheaves of successful diplomacy, no Longfellow or Hawthorne, crowned with the wreath and glory of literature, has been welcomed by his countrymen with such distinguished marks of admiration and approval as were awarded to Dorsey on his return from the field of his successful crime. The feast in his honor at Delmonico's was right royal. Wealth contributed its vessels of gold until it flowed as waters run. The charms of literature were invoked in bis praise. It was a distinguished assemblage. An ex-prosident sat by his side and proposed his health, long life and prosperty. A vice-president-sleet made the speech of the evening, in which he said. Mr. Dorsey was selected as the leader of the forlorn hope to carry Indiana. Beecher and Newman were there. Did they represent your clergy? Gould was there. The glant monopolists were there and towered above presidents, vicepresidents and ciergy. The fraud of 1876-77 breathed its poisoned breath into the debauch, and presided over all was the ogra of the occasion, the solut of partial common people. For a full description of the meeting and noisy approval of a great political outrage I refer you to the New York Times of Feb. 12, 1881.

The speaker spent some time upon the tiquor question, arguing for the license system, and opposing prohibition on the plea of personal liberty.

PINALE OF THE FAIR

Military Prise Drill-The Buby Show-

The annual county fair closed last evening, the total receipts footing up \$9,000, about \$800 less than the amount taken in last year. There was only one really good day, and that was Thursday, when the farmers came out in goodly numbers, thus exploding the declaration that the farmers don't come to the fair. Had it not been for the attendance of the farm-ere the management would not have been able to pay more than 20 cents on the dollar, but as it is, they will pay about 50 or 60 cents. It was to the effect that just previous to the shooting he (Cooper) had taken out his knife to cut a plug of tobacco, and after doing that he closed the knife, but whether he put it back into his pocket, or was holding it closed in his hand at the time Adams shot, he did not recollect, This afternoon Mr. Cooper was still alive, with no noticeable change in his condition.
